MEDICINAL.

HOW TO HOLD A HUSBAND.

The best known guide to married happiness is to hold the husband as you would the patient and keep your youthful looks. Of course a great many women are handicapped by those ills to which women are subject. The constantly recurring troubles which afflict her are apt to cause a sour disposition, nervousness and a bedridden mind.

Dr. R. V. Pierce, the specialist in woman's diseases, of Buffalo, N. Y., after a long experience in treating such diseases, found that certain roots and herbs made into a liquid extract would help the majority of cases. This he called Dr. Pierce's Favorite Prescription. Thousands of women have testified to its merits, and it is put up in shape to be easily procured and is sold by all medicine dealers. This is a potent tonic for the womanly system. So much faith has Dr. Pierce in its merits that he offers \$500 reward for any case of Leucorrhoea, Female Weakness, Protrusion, or Falling of Womb, which he cannot cure. All he asks is a fair and reasonable trial of his means of cure.

"I cannot express my thanks for the benefit I have received from Dr. Pierce's medicine," writes Mrs. Julius Wehrly, of Cambridge, Rochester County, Md. "I took Dr. Pierce's Favorite Prescription and feel that a perfect cure has been effected. I feel like that you have done me, and for the kind and fatherly letters which you wrote. I shall always keep a good word for your medicine whenever I can."

Dr. Pierce's Common Sense Medical Adviser is sent free on receipt of stamps to pay expense of mailing only. Send at once ten stamps for the paper-covered book, or 31 stamps for the cloth-bound volume. Address Dr. R. V. Pierce, 663 Main Street, Buffalo, N. Y.

HICKS FOR JUNE.

Rev. Irl R. Hicks, the St. Louis weather prognosticator, promises some "spells" of unsettled, stormy weather in June.

The first storm period is central on the 4th, extending from the 2d to the 6th. On the 2d and 3d it will grow much warmer. During the 4th to 6th marked electrical storms will move eastward across the country. Intense lightning and thunder, with hail and heavy rain in many parts may be counted on. There will be a change to much cooler, with rising barometer, westerly winds and clearing skies after the storm.

In the second storm period—reactionary—from about the 8th to 12th, there will be sultry winds from east and south, attended by low and fluctuating barometer. General rain and thunder storms, with abnormal displays of lightning and heavy hail, may be expected, reaching a crisis about the 9th to the 12th. For several days there after there may be protracted storms and thunder squalls. Very changeable temperatures will be experienced, ranging from phenomenally high to unseasonably cool.

The third storm period—regular—is central on the 16th. There may be expected a very warm wave, low barometer and high humidity, causing many very active and violent electrical storms, with downpours of rain and hail. Change to high barometer and surprisingly cool, almost to frost northward, will come in from the northwest behind these storms.

The fourth storm period—reactionary—central on the 21st to 22d, should bring rising temperature and falling barometer, with much lightning in the heavens during the nights and afternoon thunder squalls and showers, to the great annoyance of haymakers.

The last storm period—regular—may bring a prolonged period of threatening, stormy culminations, one entering about the 25th and the other about the 30th. A very warm wave will appear in western parts about the 24th and rapid storms of wind, rain and thunder need not surprise on and touching the 25th. There may be a daily cycle of afternoon thunder storms, up to the end of the month. Possibly a rising barometer, west winds and cooler may intervene, bringing fair weather from about the 27th to the 29th. But returning warmth, low barometer and electrical storms are almost certain to develop about the 30th.

Monster Locomotives.

Ten monster locomotives, the largest in the world, are in process of construction at the Baldwin Works. Each will be capable of pulling a greater weight than ever before accomplished by a single locomotive.

These machines are part of an order for 50 placed by the Atchafalaya, Topeka and Santa Fe Railroad Company, and the work of construction is being rushed for an early delivery. It is expected that these locomotives will prove the beginning of an epoch in railroad freighting, which may result in the abolition of thousands of smaller and weaker engines of this and other countries.

They are the product of a theory that one gigantic locomotive, having the power of two of the present average type, can be operated more cheaply than two small ones.

The 10 locomotives will be able to pull 60,000 tons of dead weight on a level grade. If the first-class armored steel battleships Vermont, Connecticut, Kansas and Ohio were placed upon wheels on a level track it is safe to say that they could be pulled across the continent by the 10 locomotives. A string of 15 or 20 of the ordinary type of freight engines would be required to pull a similar weight.

The weight of each engine complete will be about 280,000 pounds, and that of the tender about 200,000 pounds. Their speed will be much greater than that of freight locomotives now used in pulling the ore trains of the Santa Fe road, and their cost will probably be at least a third more than that of the best freight engine now on the road.

From the time the first cast was made until the first shipments shall start over the rails for the southwest, 50 days will have elapsed. A force of about 18,000 men assist in the construction of each of these engines, the thousands of pieces of iron and steel being directly handled by at least half that number.

Triumphs of Modern Surgery.

Wonderful things are done for the human body by surgery. Organs are taken out and scraped and polished and put back, or they may be removed entirely; bones are spliced; pipes take the place of diseased sections of veins; antiseptic dressings are applied to wounds, bruises, burns and like injuries before inflammation sets in, which causes them to heal without maturation and in one-third the time required by the old treatment. Chamberlain's Pain Balm acts on this same principle. It is an antiseptic and when applied to such injuries, causes them to heal very quickly. It also allays the pain and soreness. Keep a bottle of Pain Balm in your home and it will save you time and money, not to mention the inconvenience and suffering which such injuries entail. For sale by Richard Gibson and W. F. Creighton & Co.
